Lesson 13: Addition Using Money - Advanced

Sometimes the $.00 is not used when a rounded dollar amount is being added. For example: $10.00 is often written $10. If this occurs, you need to put in the .00 in order to keep your numbers in the proper places.

Example: $10 + $6.79 = $16.79 You should write it this way:

\[
\begin{align*}
\text{You should write it this way:} & \quad 10.00 \\
+ & \quad 6.79 \\
\hline
& \quad 16.79
\end{align*}
\]
